

Compact Directional Antenna

The Compact Directional Antenna enlarges the direction of the Base Station, allowing long connections distance.

The small dimensions and low environmental impact make it a perfect solution for outdoor use in GSM Dual Band at 900 and 1800 MHz, DECT and for third generation devices.

12.5 m coaxial extension cables are available upon request.

Gain	9.0 dBi
VSWR in band	< 2:1
Polarization	vertical
Connector	male SMA (other available on request)
Use	indoor/outdoor
Cavo	low loss (5m standard, other available on request)
